

**Postdoctoral Research Associate  
Experimental Particle Physics  
University of Nebraska at Lincoln**

The experimental high-energy physics group at the University of Nebraska at Lincoln invites applications to immediately fill two postdoctoral researcher positions. The appointed individuals will be resident at Fermilab and will participate in operations and data analysis on the DZERO experiment, and the construction, testing and commissioning of the forward silicon pixel detector of the CMS experiment. Interested candidates should submit a CV, statement of research interests, and arrange for at least three letters of recommendation to be sent to Professors Kenneth Bloom and Aaron Dominguez via e-mail at [postdoc@crop.unl.edu](mailto:postdoc@crop.unl.edu).

Review of applications will begin 15 October 2004 and continue until the positions are filled.

UNL is committed to a pluralistic campus community through AA/EO. We assure reasonable accommodation under the ADA. Contact K. Bloom at (402)472-6093 or A. Dominguez at (402)472-6016 if you have questions.
