

ILC Positron Systems Collaboration Meeting, Argonne National Laboratory

Conventional Source Activities

J. C. Sheppard/ V. Bharadwaj
SLAC

September 19, 2007

Conventional Source Action Items

Bharadwaj/Sheppard

(Cost estimate and comparison w/ Undulator Source was made in September, 2006)

No actions presently planned

Recommend that KAS be eliminated

(a) Eliminate all together

(b) Reserve space in tunnel but do not build until failure in Undulator Source drives the need

Affirm ILC KAS Requirements (present requirements: 10% intensity, full bunch format)
